Development Task

Brief

This task is meant for you to show us your skills in the following languages.

- C# / .NET
- Angular
- Bootstrap
- CSS / HTML

Evaluation

The code should be placed on github in a open repository for us to evaluate. Please provide a README.md file with relevant information.

Questions

Any question can be asked to Rasmus Styrk at rasmus@houseofcode.io.

Tasks

The project that you are going to create will be a landing page that includes login functionality.

The following tasklist gives a brief overview

1. Landingpage
2. Sign in dialog
3. Sign up dialog

Extra task:

1. Deploy the working website on a Microsoft Azure platform

You can see a prototype of the webpage here:

https://hoc.invisionapp.com/share/7FSJJNZPTWY
